## Approval of foils for lamination acc. Technical Appendix "D" to RAL-GZ 716

Dear Mr. Cho,

LX Hausys (former LG Hausys) has received confirmations of conformity for decorative exterior foils for laminating U-PVC-window- and door profiles according to the respective valid version of our quality- and test-requirements since 2009. The current valid version of the requirement is Technical Appendix "D" to RAL-GZ 716 (01.2023).

On our website we have listed all design groups and individual designs of films that have passed the tests acc. to the above mentioned requirements.

### LX Hausys has 89 designs listed (as of 07.2023)

on our website that have been tested in conformity with Technical Appendix "D" to RAL-GZ 716. These designs as listed on the website may be marked and advertised with the legally protected mark  as proof of conformity.

The details of the web-listing contain information for each foil design on the class of artificial weathering resistance and on the solar reflectance behavior (former "heat-build-up").

Please see the current listing of LX Hausys designs here ...
